

# Extension

### Extension 1 Add to Your Portfolio

Complete the Web exercise by:

1. Adding your philosophy of education, resume, and leisure time activities (pictures, if possible) into the **index1**, **index2**, and **index6** pages respectively. Look through the Reflections that you wrote on selected modules for ideas on your philosophy of education. This will change as you take your methods classes, and do your observation and field experience but get a start on it now.

**Remember:** During your Observation/Field Experience and your Student Teaching, you can add pictures and text to compliment what you have started here on the **index4** and **index5** pages. Use the method described at the end of the Guided Practice (#20) for simple additions.
